REI/GEKI

Water-in Cool Cap

Item number; CIJ-CP24(color)

International patent
pending

Cools via
evaporative heat

All-season type

Cooling effect lasts
with 50 cc of water.
Unique structure

Patented JP7518321
PCT / JP2024 / 024792

Cool down by **-10°C**
with just 50 ml of water.

Navy

Silver

Orange

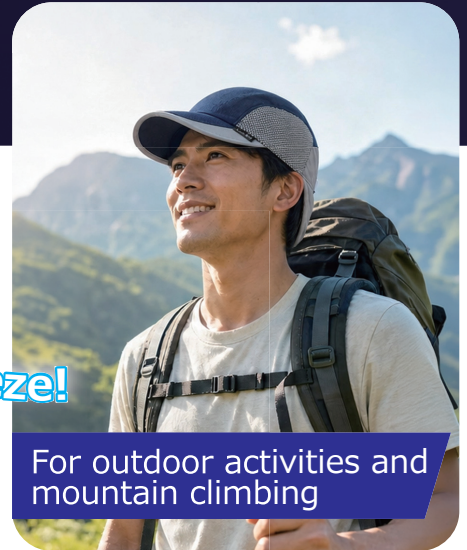

Sky

For running and sports

For driving and commuting

For outdoor activities and
mountain climbing

Even cooler
with
the air conditioner breeze!

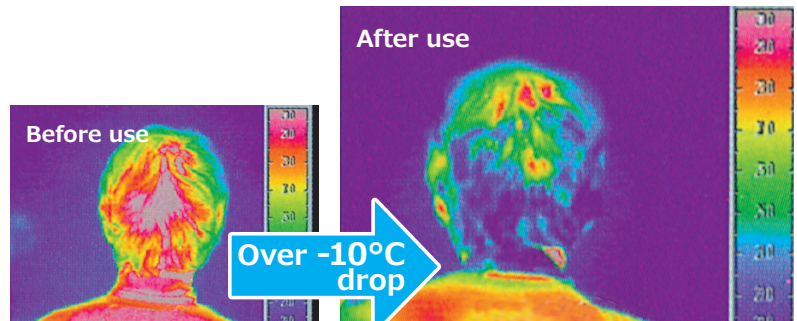

The cooling effect is obvious at a glance.
Keeps you cool for 2 to 3 hours.

Just pour
water!
Patented evaporative
cooling structure.

Water

It feels even cooler if you use cold water!

■ Specifications ;
Product Name coolbit · Water-in cap
Item Number CIJ-CP24(color)
Colors NVY(Navy), SLV(Silver)
ORG(Orange), SKY(Sky)
Material Cap Body: 100% Polyester Mesh
Cooling Flap: Polyester with built-in
polymer-substituted superabsorbent fibers
Size One size fits most (59 cm L size), fits approx.
57-61 cm. Adjustable with hook-and-loop fastener.
Brim Length Approx. 8.5 cm
Flap Size Approx. H 8.5 × W 21 cm
Weight 50 g (when dry)

REI/GEKI

Water-in
wear unit

Item number; CBWIW-U01

Just stick it to the inside of your current jacket.
Experience a **-10°C** cooldown
as water circulates.

Easily attaches to your current
uniform or workwear!

Water
Injection

Product
Description

1 Stick the included
adhesive hook-and-
loop fastener to
the inside of
the jacket.

2 Attach the
cooling unit.

3 Pour in
approximately
150 ml of water.

Various ways to use

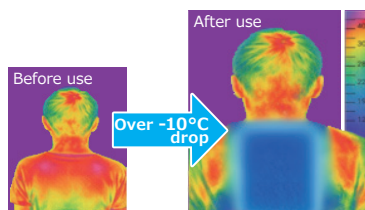

Just pour
water!
Patented evaporative
cooling structure.

Can also be attached to
fan-cooled work
jackets for extra
freshness!

* In response to the era of extreme heat and global warming, this patent-pending evaporative cooling structure unit can also be integrated into uniforms and workwear for government offices, Organizations, and corporations.

The cooling effect is obvious at a glance.
Keeps you cool for 2 to 3 hours.

Cold water or adding
a few ice cubes is also OK!

Unique Water-Injection Evaporative Cooling Structure

Cross-Sectional Structure
① Breathable Waterproof Fabric
② Special Water-Absorbent Material
③ Inner Lining (Reinforcing Fabric)
④ Water Channel

■ For heat protection in uniforms!

Highly popular! Instantly transforms sports teams, outdoor work groups, and company uniforms into refreshing, heat-defying workwear!

■ Achieves natural coolness through evaporative cooling!

Patent-pending structure : Maximum evaporative cooling effect with no batteries required.

Cooling effect lasts 2-3 hours : Just 150 ml of water keeps you cool for over 2 to 3 hours.

Highly versatile design : Compatible with a wide variety of jackets and outerwear.

■ Specifications ;

Product Name coolbit · Water-in wear unit
Item Number CBWIW-U01
Material Main Mesh Part: 100% Polyester
Breathable Waterproof Fabric: 100% Nylon
Water-Absorbent Part: Acrylic, Synthetic fiber (Acrylate-based), Polyester, Rayon, Polyethylene
Size A4 size (Approx. 210 × 297 mm), Thickness: Approx. 5 mm
Weight Approx. 50 g
Accessories Adhesive hook-and-loop fastener (loop side) 6-piece set
