

Cooling Gear for Summer Sports!

coolbit®

coolbit® Water-In Cool Vest (Sports & Outdoor Edition)

Model No: CBWIV-01SP

Product Coming Soon

A new cooling experience for tennis, golf, fishing and hiking under the scorching sun.

Cooling by Water Evaporation Only

For various summer uniforms!

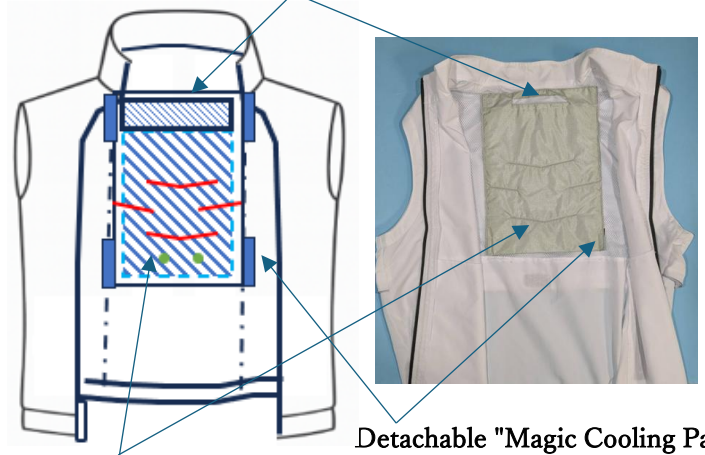

Front Water Inlet

"So convenient! You can refill it anywhere—at the tennis court or the golf lounge—directly from a plastic water bottle!"

"Patent Concept Diagram" Back Water Inlet

★This Patented Evaporative Cooling Unit can be integrated into uniforms and workwear for government agencies, organizations, and corporations to combat global warming..

Patent NO; JP2026- 7719

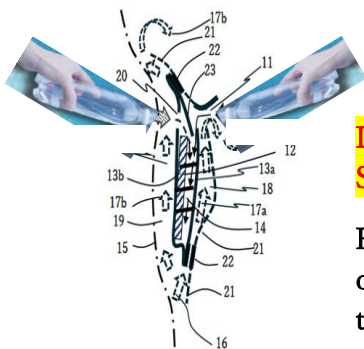

Instant Cooling:
Just add water from pet bottle.

Performance: "Chills for over 2 hours with just 150ml of water."

Patented Evaporative Cooling Unit (Patent Pending)

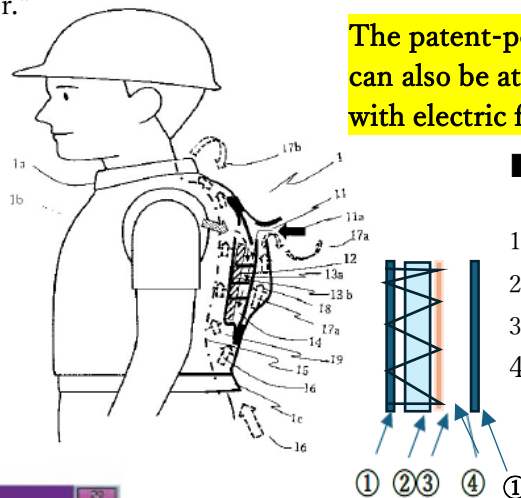

Easy Attachment: Uses hook-and-loop fasteners (Velcro) for quick removal.
Hygienic: Remove the cooling unit to wash the vest easily.

The patent-pending cooling unit can also be attached to work clothes with electric fans.

Dual Water-In System

Refill from the front or back without taking off the vest!

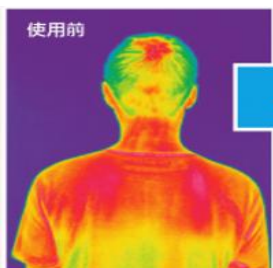

Internal Structure of cooling unit

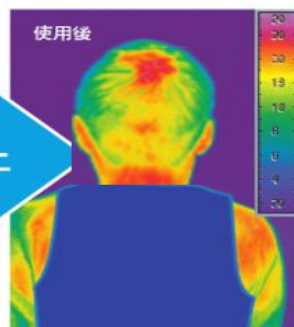

1. Breathable Waterproof Fabric
2. Special Absorbent Material
3. Inner Lining (Patch)
4. Water Channel

Cooling effects are obvious!

Lasts 2-3 hours (-10° C or more).

-10°C以上
